
Professional Summary

Highly accomplished and results-driven Cloud Architect with extensive experience designing, implementing, and managing secure, scalable, and cost-optimized cloud solutions across AWS, GCP, and Azure. Proven ability to leverage infrastructure as code (Terraform, Ansible) and containerization technologies (Docker, Kubernetes) to automate infrastructure provisioning, governance, and deployment pipelines. Strong understanding of cloud security best practices and compliance frameworks (SOC 2, ISO 27001). Adept at collaborating with cross-functional teams to deliver innovative cloud solutions in fast-paced environments.

Core Competencies

AWS	Azure	GCP
Terraform	Kubernetes	Docker
Ansible	Cloud Security & Compliance	HashiCorp Vault

Professional Experience

Sr. Cloud SME, FedSoft, Inc |

Leading cloud modernization initiatives, automating infrastructure provisioning and governance using Terraform and AWS. Designing and implementing scalable, multi-cloud architectures leveraging Kubernetes. Implementing automated security controls with HashiCorp Vault and AWS IAM, ensuring compliance and optimizing cloud cost management.

Infra Architect, Clover |

Led the design and deployment of secure, scalable cloud infrastructure on AWS using Terraform. Architected Kubernetes-based container platforms, integrated cost optimization strategies, and implemented DevSecOps practices. Drove compliance efforts for SOC 2, PCI DSS, and ISO 27001.

Chief Solutions Architect, HappyPathway |

Architected cloud-agnostic, self-service infrastructure using Terraform, Packer, and Ansible. Designed and deployed Kubernetes solutions across AWS, GCP, and Azure. Implemented DevSecOps practices, improving compliance with SOC 2 and ISO 27001 while reducing cloud costs.

Sr. Solutions Engineer, HashiCorp |

Delivered Terraform and Vault workshops, showcasing expertise in infrastructure as code and security automation. Built scalable demo environments and served as a Terraform Enterprise subject matter expert.

Sr. Site Reliability Engineer, AppDynamics |

Led production support and monitoring, automating deployment pipelines using Jenkins and integrating Consul for centralized configuration management. Spearheaded the development of an automated AWS AMI pipeline using Packer and Terraform.

DevOps Engineer, RetailNext |

Architected and automated AWS infrastructure using Infrastructure as Code (IaC) with Terraform. Developed a scalable continuous deployment pipeline and implemented a real-time monitoring framework, integrating cloud security best practices.

Technical Skills

AWS	Azure	GCP	Terraform	Kubernetes	Docker
Ansible	Cloud Security & Compliance		CI/CD	CI/CD Pipelines	
HashiCorp Vault			Cloud Governance		
Cost Optimization
