Re: Application for

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Cloud and DevOps Architect position at [Company Name], as advertised on [Platform where you saw the ad]. Having closely followed [Company Name]'s innovative work in [Industry/Area of Interest], I am particularly drawn to this opportunity to contribute my expertise in building and managing scalable, secure, and cost-optimized cloud infrastructure.

My 10+ years of experience in cloud and DevOps architecture, spanning AWS, GCP, and Azure, aligns perfectly with the requirements outlined in the job description. In my current role as Sr. Cloud SME at FedSoft, Inc., I have spearheaded cloud modernization initiatives, leveraging Terraform and Kubernetes to automate infrastructure provisioning and governance. I have a proven track record of developing reusable Terraform modules, enforcing best practices and compliance, and implementing automated security controls using HashiCorp Vault and AWS IAM. Furthermore, my experience optimizing cloud cost management has resulted in significant savings for the organization.

Prior to FedSoft, I served as Infra Architect at Clover, where I led the design and deployment of highly scalable and secure cloud infrastructure using Terraform and AWS. I architected Kubernetes-based container platforms, integrated cost optimization strategies, and implemented a self-service infrastructure model, empowering development teams to rapidly deploy and manage their applications. My experience driving compliance efforts for SOC 2, PCI DSS, and ISO 27001 ensures that security and compliance are at the forefront of my architectural decisions.

My experience at HashiCorp as a Sr. Solutions Engineer provided me with in-depth knowledge of Terraform and Vault, which I have leveraged throughout my career to build robust and secure infrastructure solutions. This experience, combined with my background in Site Reliability Engineering at AppDynamics, where I automated

deployment pipelines and migrated configuration management systems, has given me a comprehensive understanding of the entire DevOps lifecycle.

I am confident that my skills and experience in cloud architecture, automation, security, and compliance make me an ideal candidate for this position. I am eager to learn more about this opportunity and discuss how I can contribute to [Company Name]'s continued success. Thank you for your time and consideration.

Sincerely, [Your Name]
