

---

## Professional Summary

---

Highly accomplished and results-oriented Cloud Solutions Architect with 10+ years of experience designing, implementing, and managing robust, scalable, and secure cloud infrastructure on AWS and other platforms. Proven ability to leverage serverless technologies and IaC tools like Terraform to automate infrastructure provisioning, governance, and security. Expertise in Kubernetes, CI/CD pipelines, and cloud-native best practices. Passionate about serverless architectures and eager to contribute to Serverless Guru's innovative work in this space.

## Core Competencies

---

AWS	Terraform	Kubernetes
CI/CD	Cloud Security	Cost Optimization
Ansible	Packer	Helm

## Professional Experience

---

### Sr. Cloud SME, FedSoft, Inc |

Leading cloud modernization initiatives, focusing on automating infrastructure provisioning and governance using Terraform and AWS. Designing and implementing scalable, multi-cloud architectures leveraging Kubernetes and implementing automated security controls with HashiCorp Vault and AWS IAM. Optimizing cloud cost management and collaborating with cross-functional teams to establish cloud governance policies.

### Infra Architect, Clover |

Led the design and deployment of scalable and secure cloud infrastructure on AWS using Terraform. Developed a standardized IaC framework, architected Kubernetes-based container platforms, and integrated cost optimization strategies. Implemented DevSecOps practices and drove compliance efforts for SOC 2, PCI DSS, and ISO 27001.

### Chief Solutions Architect, HappyPathway |

Architected self-service infrastructure using Terraform, Packer, and Ansible. Designed and deployed cloud-agnostic Kubernetes solutions and led migrations to AWS, GCP, and Azure, significantly reducing cloud costs. Implemented DevSecOps practices, improving compliance with SOC 2 and ISO 27001.

### Sr. Site Reliability Engineer, AppDynamics |

Led production support and monitoring efforts, designing and automating deployment pipelines on AWS. Migrated configuration management from Ansible to Chef and spearheaded the development of

an automated AWS AMI pipeline. Integrated Consul for centralized configuration management with Terraform and established a Jenkins-driven CI/CD process.

**DevOps Engineer, [RetailNext](#) |**

Architected and automated AWS infrastructure using IaC. Developed a scalable continuous deployment pipeline and implemented a real-time monitoring framework. Built a custom multi-tenant monitoring backend and integrated cloud security best practices.
