
Professional Summary

Highly accomplished and results-oriented Cloud Solutions Architect with 10+ years of experience designing, implementing, and managing robust, scalable, and secure cloud infrastructure on AWS and other cloud platforms. Proven ability to leverage Infrastructure-as-Code (IaC) tools like Terraform and CloudFormation to automate infrastructure provisioning, governance, and security. Expertise in Kubernetes, CI/CD pipelines, and cloud cost optimization. Passionate about innovation and collaboration, seeking to contribute to Commit's growth by delivering cutting-edge AWS solutions.

Core Competencies

AWS	Terraform	Kubernetes
CI/CD	Cloud Security	Cost Optimization
GitHub Actions	HashiCorp Vault	Cloud Governance

Professional Experience

Sr. Cloud SME, FedSoft, Inc |

Leading cloud modernization initiatives, focusing on AWS infrastructure automation, governance, and security. Designing and implementing scalable, multi-cloud architectures using Terraform and Kubernetes. Developing reusable Terraform modules to enforce best practices and compliance. Integrating CI/CD pipelines using GitHub Actions and implementing automated security controls with HashiCorp Vault and AWS IAM. Significantly optimizing cloud cost management.

Infra Architect, Clover |

Led the design and implementation of scalable and secure AWS cloud infrastructure using Terraform. Architected Kubernetes-based container platforms and integrated cost optimization strategies. Established a self-service infrastructure model and led a successful cloud migration initiative. Implemented DevSecOps practices and ensured compliance with SOC 2, PCI DSS, and ISO 27001.

Chief Solutions Architect, HappyPathway |

Architected self-service infrastructure using Terraform, focusing on AWS deployments. Designed and deployed cloud-agnostic Kubernetes solutions. Implemented DevSecOps practices, improving compliance with SOC 2 and ISO 27001. Led successful cloud migrations to AWS, reducing operational costs.

Sr. Solutions Engineer, HashiCorp |

Delivered Terraform and Vault workshops, showcasing expertise in infrastructure automation and security best practices. Built scalable demo environments and served as a Terraform Enterprise subject matter expert.

DevOps Engineer, [RetailNext](#) |

Architected and automated AWS infrastructure using Infrastructure-as-Code (IaC). Developed a scalable continuous deployment pipeline and implemented a real-time monitoring framework. Integrated cloud security best practices.
