

---

## Professional Summary

---

Highly accomplished and results-driven DevOps Architect with 10+ years of experience leading cloud modernization efforts, designing and implementing scalable, secure, and cost-optimized infrastructure solutions across AWS, Azure, and GCP. Proven ability to automate infrastructure provisioning, governance, and CI/CD pipelines using Terraform, Ansible, Kubernetes, and other leading technologies. Passionate about fostering collaborative environments and driving continuous improvement through DevSecOps practices. Seeking to leverage expertise to lead and shape DevOps strategy at Connexions.

## Core Competencies

---

AWS	Azure	GCP
Terraform	Ansible	Kubernetes
CI/CD	CI/CD Pipelines	Infrastructure as Code

## Professional Experience

---

### Sr. Cloud SME, FedSoft, Inc |

Spearheaded cloud modernization, automating infrastructure provisioning and governance using Terraform, AWS, and Kubernetes. Developed reusable Terraform modules, enforcing best practices and compliance. Implemented GitHub Actions-based CI/CD pipelines and automated security controls using HashiCorp Vault, AWS IAM, and Sentinel, significantly optimizing cloud cost management.

### Chief Solutions Architect, HappyPathway |

Architected self-service infrastructure using Terraform Enterprise, Packer, and Ansible, deploying cloud-agnostic Kubernetes solutions across AWS, GCP, and Azure. Implemented DevSecOps practices, ensuring compliance with SOC 2 and ISO 27001, while significantly reducing cloud costs through strategic migrations.

### Infra Architect, Clover |

Led design and deployment of scalable, secure, high-performance cloud infrastructure on AWS using Terraform and Kubernetes. Implemented a standardized IaC framework, integrated cost optimization strategies, and created a self-service infrastructure model. Drove compliance efforts for SOC 2, PCI DSS, and ISO 27001.

### Sr. Solutions Engineer, HashiCorp |

Delivered Terraform and Vault workshops, building scalable demo environments. Served as a Terraform Enterprise SME, showcasing expertise in infrastructure automation and security.

**Sr. Site Reliability Engineer, AppDynamics |**

Led production support and monitoring, automating deployment pipelines. Migrated configuration management from Ansible to Chef, developed an automated AWS AMI pipeline, and integrated Consul for centralized Terraform configuration. Established a Jenkins-driven CI/CD process.

**DevOps Engineer, RetailNext |**

Architected and automated AWS infrastructure using IaC, developing a scalable continuous deployment pipeline. Designed and implemented a real-time monitoring framework and a custom multi-tenant monitoring backend.
