

---

## PROFESSIONAL SUMMARY

---

Highly motivated and results-oriented Cloud & DevOps Architect with extensive experience in designing, implementing, and managing robust and scalable infrastructure on AWS, Azure, and GCP. Proven ability to automate deployments, optimize costs, and ensure security and compliance using tools like Terraform, Ansible, Kubernetes, and CI/CD pipelines. Expertise in GitHub automation and infrastructure as code (IaC) best practices. Seeking a challenging role to leverage my skills and contribute to the success of a dynamic organization.
