# **Professional Summary**

Highly accomplished and results-driven DevOps Architect with 10+ years of experience leading cloud modernization efforts, designing and implementing scalable, secure, and cost-optimized infrastructure solutions across AWS, Azure, and GCP. Proven ability to automate infrastructure provisioning, governance, and CI/CD pipelines using Terraform, Ansible, Kubernetes, and other leading technologies. Passionate about fostering collaborative cultures and driving innovation through automation.

# **Core Competencies**

| AWS             | Azure           | GCP              |  |  |
|-----------------|-----------------|------------------|--|--|
| Terraform       | Ansible         | Kubernetes       |  |  |
| CI/CD Pipelines | HashiCorp Vault | Cloud Governance |  |  |

# **Professional Experience**

## Sr. Cloud SME, FedSoft, Inc |

Spearheaded cloud modernization, automating infrastructure provisioning and governance across multi-cloud environments using Terraform, AWS, and Kubernetes. Developed reusable Terraform modules, enforcing best practices and compliance. Implemented automated security controls (HashiCorp Vault, AWS IAM, Sentinel) and optimized cloud cost management. Integrated GitHub Actions-based CI/CD pipelines.

#### Chief Solutions Architect, HappyPathway

Architected self-service infrastructure leveraging Terraform Enterprise, Packer, and Ansible. Designed and deployed cloud-agnostic Kubernetes solutions. Implemented DevSecOps practices, ensuring compliance with SOC 2 and ISO 27001. Led cloud migrations across AWS, GCP, and Azure, significantly reducing costs.

#### Infra Architect, Clover |

Led design and deployment of scalable, secure cloud infrastructure using Terraform and AWS. Architected Kubernetes-based container platforms and integrated cost optimization strategies. Created a self-service infrastructure model and led a successful cloud migration initiative. Implemented DevSecOps practices and drove compliance with SOC 2, PCI DSS, and ISO 27001.

#### Sr. Solutions Engineer, HashiCorp |

Delivered Terraform and Vault workshops and built scalable demo environments. Served as a subject matter expert for Terraform Enterprise.

# Sr. Site Reliability Engineer, AppDynamics |

Led production support and monitoring, automating deployment pipelines. Migrated configuration management from Ansible to Chef. Developed an automated AWS AMI pipeline and integrated Consul for centralized Terraform configuration. Established a Jenkins-driven CI/CD process.

## **DevOps Engineer**, RetailNext |

Architected and automated AWS infrastructure using IaC. Developed a scalable continuous deployment pipeline and implemented a real-time monitoring framework. Built a custom multi-tenant monitoring backend and led automated server provisioning.

## **Technical Skills**

| AWS              | Azure | GCP         |                   | Terraform                   | Ansible | Kubernet |
|------------------|-------|-------------|-------------------|-----------------------------|---------|----------|
|                  |       |             |                   |                             |         |          |
|                  |       |             |                   |                             |         |          |
| CI/CD Pipelines  |       | HashiCorp V | ault              | Cloud Security & Compliance |         |          |
|                  |       |             |                   |                             |         |          |
| Cloud Governance |       |             | Cost Optimization |                             |         |          |
|                  |       |             |                   |                             |         |          |
