PROFESSIONAL SUMMARY

Highly accomplished and results-driven Cloud Solutions Architect with extensive experience designing, implementing, and managing serverless and cloud-native architectures on AWS. Proven ability to leverage IaC tools like Terraform to automate infrastructure provisioning, governance, and security. Expertise in AWS services such as Lambda, API Gateway, DynamoDB, S3, and Step Functions. Passionate about serverless technologies and eager to contribute to a dynamic, remote work environment.

PROFESSIONAL EXPERIENCE

Sr. Cloud SME | FedSoft, Inc |

Led cloud modernization initiatives, designing and implementing scalable, multi-cloud architectures using Terraform and AWS. Developed reusable Terraform modules, enforcing best practices and compliance. Automated infrastructure provisioning and governance, significantly improving efficiency. Implemented automated security controls using HashiCorp Vault and AWS IAM.

Infra Architect | Clover |

Designed and deployed scalable, secure, and high-performance cloud infrastructure on AWS using Terraform. Architected Kubernetes-based container platforms and integrated cost optimization strategies. Led a cloud migration initiative and implemented DevSecOps practices, achieving compliance with SOC 2, PCI DSS, and ISO 27001.

Sr. Solutions Engineer | HashiCorp |

Delivered Terraform and Vault workshops, demonstrating expertise in infrastructure automation and security. Built scalable demo environments and served as a Terraform Enterprise SME, showcasing deep understanding of IaC best practices.

Sr. Site Reliability Engineer | AppDynamics |

Designed and automated deployment pipelines on AWS. Integrated Consul for centralized configuration management with Terraform. Established a Jenkins-driven CI/CD process, improving automation and collaboration.

DevOps Engineer | RetailNext |

Architected and automated AWS infrastructure using IaC (Terraform). Developed a scalable continuous deployment pipeline and implemented a real-time monitoring framework, enhancing operational efficiency and reliability.

TECHNICAL SKILLS

- AWS
- Terraform
- CI/CD
- CI/CD Pipelines
- Cloud Security & Compliance

- HashiCorp Vault
- Kubernetes
- Consul
- Cost Optimization
